

Our OPC balances performance factors for Mission Effectiveness and Affordability.

Our Offshore Patrol Cutter was developed for the U.S. Coast Guard as a system, not a platform. We followed an integrated system design philosophy for OPC that ensures effective, low-risk system development. We brought together innovation, performance, mission effectiveness analysis, and a proven commercial approach to offer a balanced and affordable system for the U.S. Coast Guard.

We continue to build the most diverse and complex vessels for satisfied customers worldwide. With our dedicated team, we will continue this tradition with the U.S. Coast Guard.

Offshore Patrol Cutter for the United States Coast Guard
