

ACCEPTING RESUMES FOR:

Jr. Electrical Engineer

Overview of Duties

- Assist in the design and integration of the Electric Plant on a Government ship design program. Work closely with the Purchasing and Engineering Departments as well as with Project Management.
- Serve as the focal point for all matters regarding the Electric Plant with the customer as well as within the project and with subcontractors, which are geographically located throughout the U.S. and abroad.
- Research and analysis functions may include project evaluation and monitoring.
- Produce and analyze calculations, maintain compliance with government regulations and perform any data analysis relevant to project tasks.
- Review electrical documents, diagrams and analysis.
- Coordinate with project stakeholders to ensure quality deliverables are submitted in accordance with the contract requirements.
- Assist in the production of detail plans of action and deficiency reports to support the project objectives and schedules.
- Assist in the integration of the electrical engineering design in production and work closely with the shipyard's electricians and craft superintendents.
- Regular attendance at work and the ability to work flexible hours, including overtime, weekends, and holidays.

Qualifications

- Ability to obtain and maintain a SECRET security clearance.
- Bachelor's degree in electrical engineering plus one or more years' DoD/DHS shipbuilding project experience desired. An equivalent combination of education and experience may be considered.
- Working knowledge of control systems, C4ISR systems, arrangement and cable routing. Experienced with Power Load Analysis, Voltage Drop Calculations, and Power/Lighting system One Line diagram development required.
- Experience with ABS NVR highly desired; experience with CDRL Development desired.
- Intermediate to advanced level Microsoft Word, Excel, and Outlook experience required. Strong working experience with AutoCAD.
- Ability to produce and analyze calculations using the EasyPower software package.
- Ability to solve practical problems and deal with a variety of variables in situations where only limited standardization exists.
