

# ACCEPTING RESUMES FOR:

## OPC QA Manager

### Overview of Duties

- Responsible for establishing and managing the Quality Management Program for the USCG Offshore Patrol Cutter (OPC) project. Assist Production Team with production matters and oversee specific production tasks as assigned.
- Ensure the organization's Quality Management System conforms to internal, ISO 9001 and regulatory/legal requirements.
- Manage QA/QC project scheduling and assignments to track, report and eliminate non-conformities in products and processes.
- Develop inspection, test, and appropriate sampling plans.
- Provide direction for QA surveillance, audit and evaluation program that includes all shipyard activities, consolidate results, and monitor corrective actions.
- Oversee development and execution of test plans, analyze test results and publish status.
- Provide inspection and test status reporting to production team and program management.
- Coordinate Regulatory Body Inspections for projects, ensuring sign off are completed and additional repairs are identified and documented (ABS NVR).
- Work with project team to ensure timely release and to schedule QA resource for future releases.
- Evaluate suppliers' and subcontractors' ability to meet contract quality assurance requirements.
- Investigate and define problem areas, prepare reports recommending solutions or courses of action related to projects.
- Assist Project Manager with contractual requirements for vessels as required including weekly progress and updating schedules.
- Work with production team on a daily basis assisting the ship and craft superintendents in their duties to expedite completion of vessel projects and take responsibility for quality inspection tasks from start to finish.
- Provide input and updates to status of vessel projects to production team for responsible production tasks. Be able to develop metrics and highly detailed corrective action documentation and liaison with USCG QA personnel.
- Regular attendance at work and the ability to work flexible hours, including overtime, weekends, and holidays.

### Qualifications

- Ability to obtain and maintain a SECRET security clearance.
- Bachelor's degree in Marine Engineering, Quality Assurance or a related field preferred, plus five or more year's multi-disciplinary QA/QC experience with USN/USCG and commercial vessel production projects. An equivalent combination of education and experience may be considered.
- Experience in the preparation and implementation of Inspection Plans including the management of inspection and Test Records.
- Three to five years supervisory experience desired.
- Requires knowledge of shipbuilding terminology, Occupational Safety and Health Administration (OSHA) standards, USCG classification rules and shipbuilding standards.
- Intermediate to advance level Microsoft experience including Word, Excel and PowerPoint.
- Requires excellent written and verbal communication skills and the ability to effectively present information and respond to questions from senior management, employees, government officials, and the public.
- Ability to carry out and understand assignments, and/or convey or exchange routine information.
- Ability to read, analyze, and interpret, professional journals, technical procedures, or governmental regulations.
- Ability to multi-task and work multiple projects simultaneously.
