

ACCEPTING RESUMES FOR:

Weight Control Group Manager

Overview of Duties

- Responsible for the managing of all tasks related with the Weight Estimating and Weight Control Programs for all Company New Construction Projects, defining strategy in accordance with the Contracts and Specifications of each Projects and its execution, and management of the assigned staff, man-hour budgets, and project schedule.
- As the Subject Matter Expert for Lightship Estimating and the effects on Centers of Gravity, while undertaking the necessary weight management activities, must be able to identify margin and weight consumption threats and also the opportunities for weight reduction during the development of the design and detail engineering processes.
- Prepare and issue project weight control procedures and reports following Company and Customers specified formats, with attention to the following points:
 - Specify project requirements or Budget Weights and "Not To" Exceed weights following the requirements of the Project agreed ABWE (Allocated Baseline Weight Estimate).
 - Lay-out Contingencies to be applied during various phases of the project.
 - Definition of areas of responsibility in liaison with the involved disciplines and other Contractor and/ Vendors.
 - Operate and maintain the weights control database.
 - Coordinate and collect weight data from engineering disciplines by calculating weight from the detail design drawings and production packages, other Company Departments as necessary, Project Contractors and/or Vendors, and Government Furnished Equipment/Material.
 - Back up supplied input data for traceability and perform discipline, other Company Departments, and Projects Contractors and/or Vendors weight audits (where applicable)
 - Prepare and issue project weight reports as required by Contract and Specifications.
 - Review design changes and change control documentation via ECNs, ECRs, RfIs and IQs for weight implications.
 - Propose and organize any corrective actions due to deviations from acceptable weight values of budgets.
 - Liaise with all ESG Departments as Production and Program side on all weight related matters, via Project and Contract protocols.
 - Conduct site visits and witness vendor supplied materials weighing (as applicable and required) including Government Furnished Equipment.
 - Monitor as built status and supervise module weighing as required.
 - Organize with Project Engineers and other members of other ESG department to conduct weight review meetings, to elevate weight awareness and control by all personnel involved in the project.
 - Review and coordinate interfaces for CAD Weight Database (3D Model) data transfers to the weight control database.
 - Review and implementation of weight saving proposals as required.
 - Maintain historical weight records.
- Regular attendance at work and the ability to work flexible hours, including overtime, weekends, and holidays.
